About Breaker

Breaker Resources NL is an Australian exploration company pursuing new opportunities for gold discovery in the emerging (and largely unexplored) Yamarna and Burtville Terranes, in the eastern part of the Eastern Goldfields Superterrane ("EGST"), Western Australia. Breaker's projects target structural settings where gold deposits are known to be most common based on quantitative spatial analysis studies in the well-explored western part of the EGST. These structural settings include previously underexplored major faults situated adjacent to regional anticlines, domal granite intrusions, greenstone belts and fault bends.

Breaker Resources NL is the largest tenement holder in the EGST with a 100% interest in eight exploration projects with an overall area of ~5,500 km². The Company's projects include 190 km of the Yamarna Shear Zone, four previously undrilled greenstone belts and several other large crustal faults. Significant gold discoveries made in the Yamarna and Burtville Terranes in the last ten years include Moolart Well (2002), Garden Well (2009) and Central Bore (2009). The Tropicana gold deposit, to the immediate south of the Yilgarn Craton, was discovered in 2005.
