## Lake Roe Drilling Update; Successful EIS Drill Grant

Breaker Resources NL (ASX: BRB, **Breaker**) is pleased to advise that it has been awarded a \$150,000 grant by the WA Government to co-fund planned diamond drilling at the Company's Lake Roe Gold Project, 100km east of Kalgoorlie.

The funding is provided under the Exploration Incentive Scheme administered by the Department of Mines and Petroleum. The diamond drilling will be undertaken in conjunction with planned reverse circulation (**RC**) drilling and will assist in evaluating Breaker's recent gold discovery and its potential extensions.

A 7,807m aircore drill program was completed at the Lake Roe Gold Project last week. The aim of the drilling was to assess a 4km zone situated directly north of the high-grade gold discovery in preparation for RC and diamond drilling. Significant drill intersections were encountered in the area by Breaker's previous aircore drilling (ASX Release 26 August 2015) and are of a similar tenor to that overlying high-grade primary lode gold mineralisation intersected in recent RC drilling (ASX Release 18 April 2016). Assay results are expected in approximately two weeks.

Maiden aircore drilling at the Company's Duketon North Project is planned to commence in two to three weeks.

## ASX ANNOUNCEMENT 14 June 2016

## **About Breaker**

Breaker Resources NL is a significant tenement holder in WA's Eastern Goldfields Superterrane in the Yilgarn Craton. Breaker's objective is the discovery and development of large new, greenfields gold deposits. Its long-term exploration strategy focuses on the use of innovative multi-element geochemical techniques to identify new gold systems concealed by transported cover in unexplored parts of a world class gold province, WA's Eastern Goldfields Superterrane in the Yilgarn Craton. The Company's active research and development project activities augment this strategy.
