### About Breaker

Breaker Resources NL is a significant tenement holder in WA's Eastern Goldfields Superterrane in the Yilgarn Craton. The Company's exploration strategy focuses on the use of structural analysis and innovative multi-element geochemical techniques to identify large new gold systems concealed by transported cover. Under-cover areas in WA's high-endowment Eastern Goldfields Superterrane are largely unexplored and represent a new and highly prospective search space that is now amenable to exploration using modern geochemical techniques not available 20 years ago. The Company's research and development project activities augment this strategy.
