### ISSUE OF EXPLORATION CREDITS FOR 2017 INCOME TAXATION RETURN

#### Background

Breaker Resources NL is participating in the federal government's 2015/16 Exploration Development Incentive (**EDI**) Scheme, which is administered by the Australian Taxation Office (**ATO**). The EDI enables eligible exploration companies to create exploration credits by giving up a portion of their tax losses from eligible exploration expenditure and distributing these exploration credits to equity shareholders.

The Directors have determined to allocate the maximum amount possible under the statutory formula in the calculation of the Company's available exploration credits, being \$632,502.21. Shareholders' exploration credits are calculated in proportion to the number of shares (either fully paid or partly paid) held at the record date, being 31 May 2017 (**Exploration Credits**). The Exploration Credit per share has thus been calculated as \$0.004750. Entitlements are rounded down to the nearest cent.

The Exploration Credits are only available to be utilised by Australian resident shareholders for taxation purposes for the 2017 income taxation year. Further, the ATO has stipulated that the Exploration Credits are non-transferable.

Details of your pro rata entitlement to Exploration Credits are provided below.
