

A rare new greenfields gold camp, 100km from Kalgoorlie, Western Australia

This presentation is for information purposes only. Neither this presentation nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of shares in any jurisdiction. This presentation may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their own jurisdiction. A failure to do so may result in a violation of securities laws in such jurisdiction. This presentation does not constitute financial product advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentation are not intended to represent recommendations of particular investments to particular persons. Recipients should seek professional advice when deciding if an investment is appropriate. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments. To the maximum extent permitted by law, Breaker Resources NL (Breaker) does not warrant the accuracy, currency or completeness of the information in this presentation, nor the future performance of the Company, and will not be responsible for any loss or damage arising from the use of the information.

Certain statements contained in this presentation, including information as to the future financial or operating performance of Breaker and its projects, are forward-looking statements. Such forward-looking statements: are necessarily based upon a number of estimates and assumptions that, whilst considered reasonable by Breaker, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies; involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward-looking statements; and may include, among other things, statements regarding targets, estimates and assumptions in respect of metal production and prices, operating costs and results, capital expenditures, Ore Reserves and Mineral Resources and anticipated grades and recovery rates, and are or may be based on assumptions and estimates related to future technical, economic, market, political, social and other conditions. Breaker disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise. The words "believe", "expect", "anticipate", "indicate", "contemplate", "target", "plan", "intends", "continue", "budget", "estimate", "may", "will", "schedule" and other similar expressions identify forward-looking statements. All forward-looking statements made in this presentation are qualified by the foregoing cautionary statements. Investors are cautioned that forward-looking statements are not guarantees of future performance and accordingly investors are cautioned not to put undue reliance on forward-looking statements due to the inherent uncertainty therein.

Competent Persons Statement

The information in this report that relates to Exploration Targets and Exploration Results is based on information compiled by Tom Sanders who is a Member of The Australasian Institute of Mining and Metallurgy. Mr Sanders is an officer of Breaker Resources NL and his services have been engaged by Breaker on an 80% of full time basis; he is also a shareholder in the Company. Mr Sanders has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Sanders consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

#The information in this report that relates to the Mineral Resources and Exploration Targets is based on information announced to the ASX on 2 September 2019. Breaker confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements, and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply.

Table: Lake Roe Project Bombora Deposit Mineral Resource September 2019

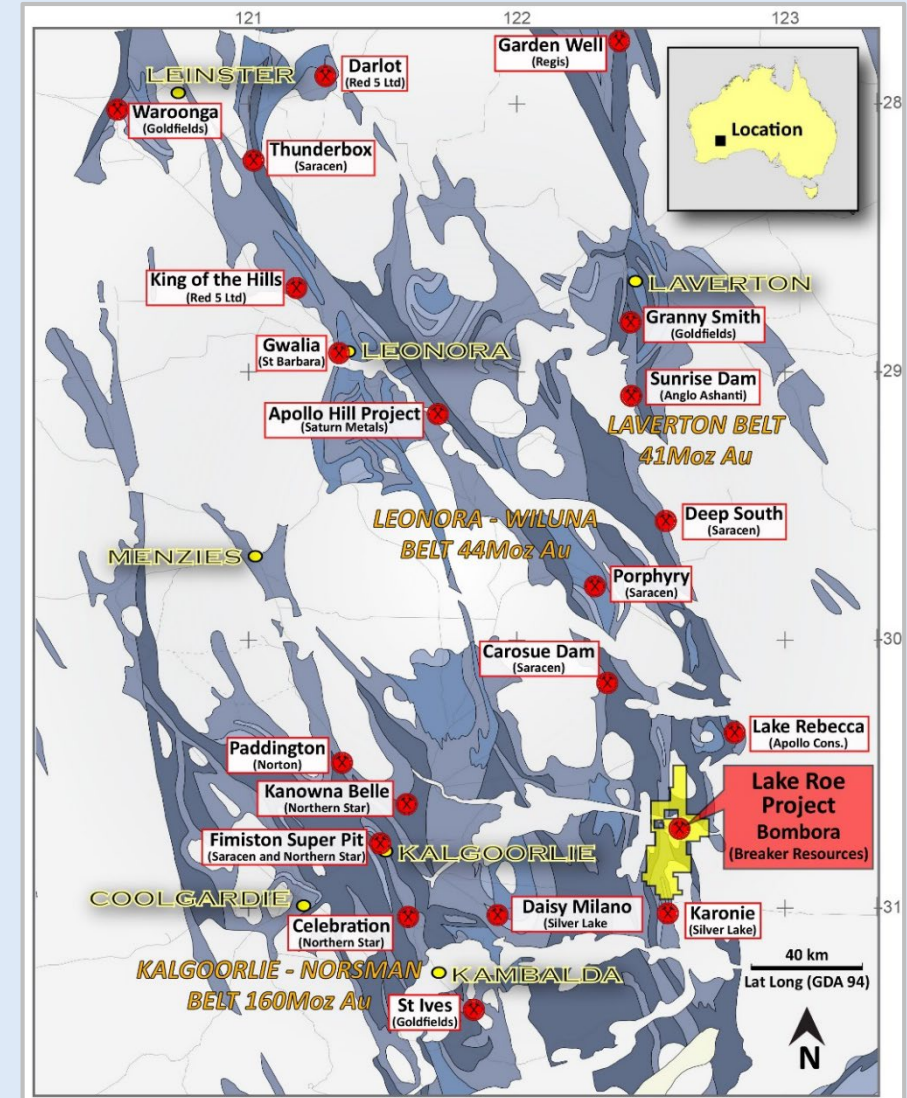

Notes:

- Reported at 0.5g/t Au cut-off
- All figures rounded to reflect the appropriate level of confidence (apparent differences may occur due to rounding)

Classification	Tonnes	Au (g/t)	Ounces
Indicated	18,356,000	1.4	803,000
Inferred	4,853,000	1.1	178,000
Total	23,210,000	1.3	981,000

- ✦ **Greenfields discovery in Tier 1 location between two operating gold mines, 100km from Kalgoorlie, Australia**
- ✦ **1Moz open-pit Resource[#] (80% Indicated @ 1.4g/t Au[#]; US\$53/oz EV*)**
 - Early de-risking – 250,000m of drilling to create development option
 - High-grade by nature – change the cut-off grade to go underground
 - Starts 5m from surface, extends to plus 800m depth, open all directions
 - 3.2km long deposit in single pit configuration, feasibility-level metallurgy, advanced environmental & hydro studies
- ✦ **2020 strategy – grow the Resource/expand mining options**
 - Three drill rigs running continuously; drilling indicates 30km-long system
- ✦ **Early success – three new large discovery areas outside Resource**
 - 1) Bombora depth extensions: +2km of high-grade lodes not in Resource
 - 2) Kopai-Crescent: 2km-long emerging discovery not in Resource
 - 3) Carbineer: 12km-long discovery zone 400m east of Bombora
- ✦ **A rare new emerging gold camp**
 - 50km of strike 100%-owned, 680km² tenure with granted mining lease

Long-term mining industry professionals aligned with shareholders

Tom Sanders
Executive Chairman

Geologist with over 35 years experience in exploration, mining and corporate management

Mike Kitney
Non-Executive Director

Process engineer with over 40 years experience in project development, mineral processing and commissioning

Mark Edwards
Non-Executive Director

Solicitor with over 30 years experience in resources and corporate law and project financing

Linton Putland
Non-Executive Director

Mining engineer with over 30 years experience in mining operations and corporate management, former mine manager Paddington

Eric Vincent
Non-Executive Director

Lawyer with extensive experience in US capital markets, former CEO of Electrum Group

Michelle Simson
Company Secretary

Alastair Barker
Exploration Manager

Stephane Roudaut
Supervising Geologist

*~Assumes A\$20m Placement and A\$3m Share Purchase Plan; *30 June 2020*

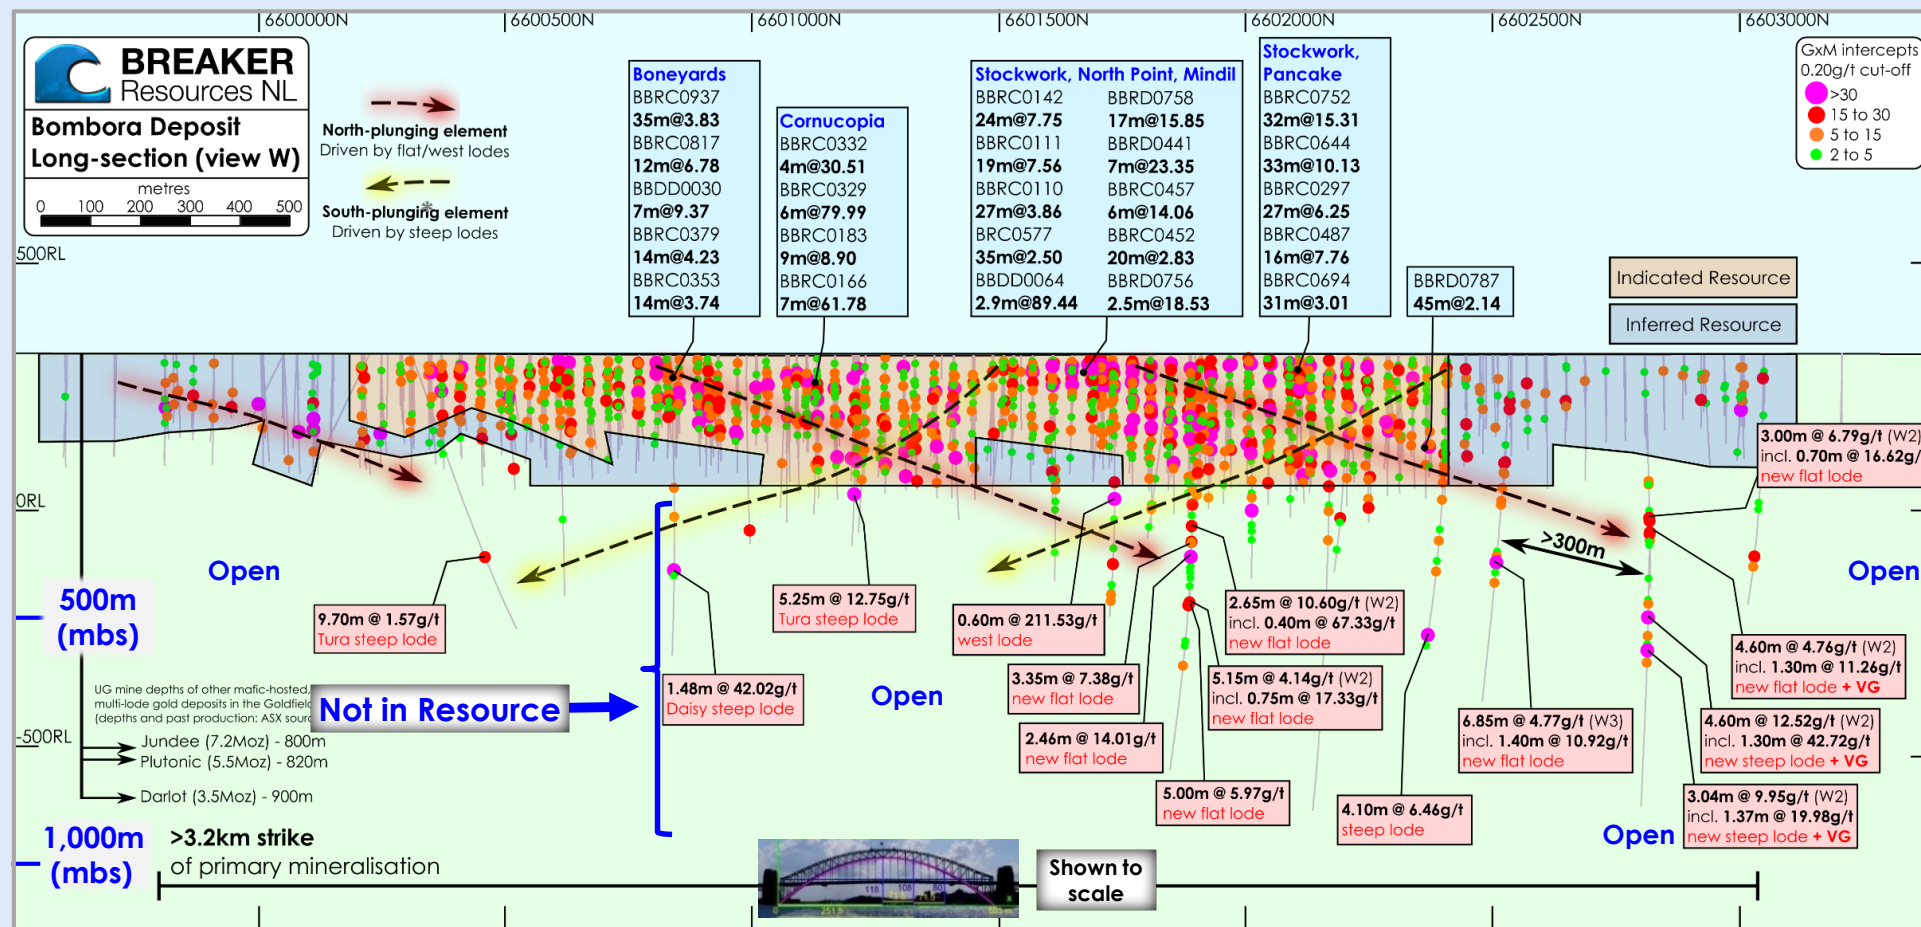

Deep de-risked value poised for re-rate

**Enterprise Value per Measured plus Indicated Resource Ounce (US\$/oz)
for Breaker and its Peer Group Companies* (A\$/US\$ = 0.73)**

* Source data provided in Appendix 1

Some of the best intersections in Australia in the last several years

- ✦ Change the lower cut-off grade to mine underground, eg.
 - 4.6m @ 12.52g/t Au
 - 5.25m @ 12.75g/t Au

- ✦ Limited by extent of drilling
- ✦ Single large pit configuration

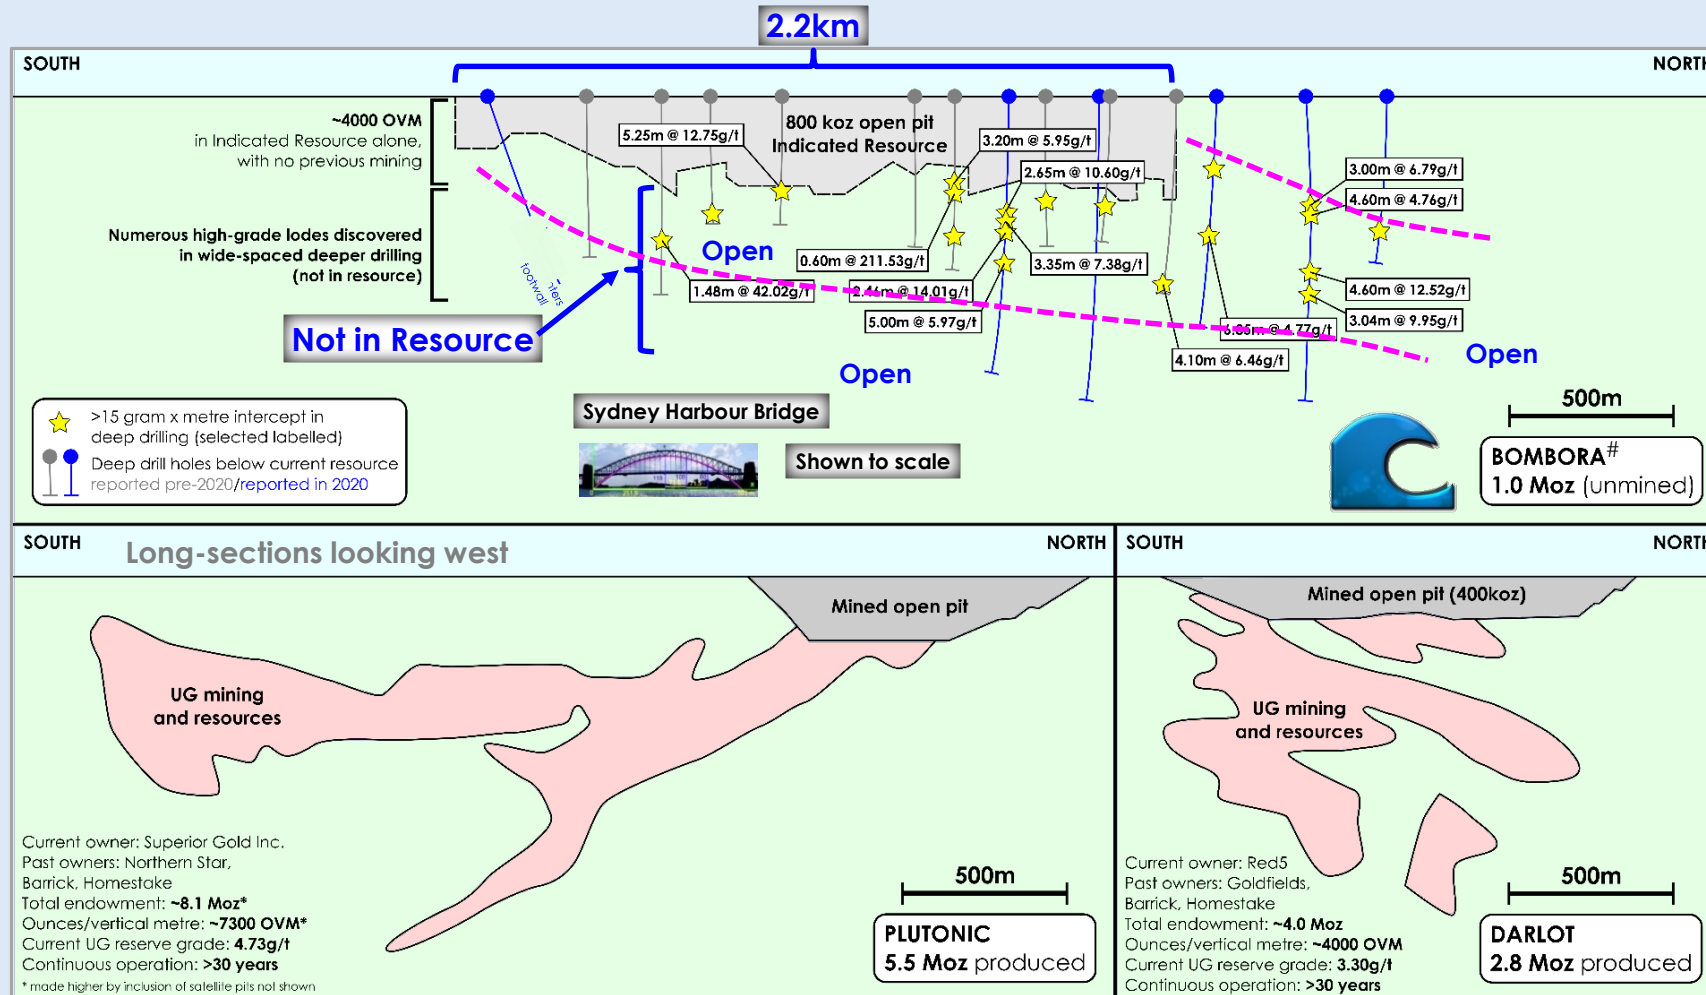

- ✦ Plus 2km strike length of high-grade lodes not yet in Resource

✦ Open pit Resource[#]

Indicated: 18.4Mt @ 1.4g/t Au (803koz); **Inferred:** 4.8Mt @ 1.1g/t Au (178koz)

A sense of scale – already large but still growing

Size comparison – Breaker's Bombora deposit vs Plutonic and Darlot at the same scale*

✦ Three typical Australian Archean lode deposits at the same scale

✦ Already large but still growing

✦ Plus 2km strike length of high-grade lodes outside the Resource

Several areas of shallow discovery since start of 2020

RC & Diamond Drilling Maximum gold (g/t Au)

Kopai-Crescent 2km north

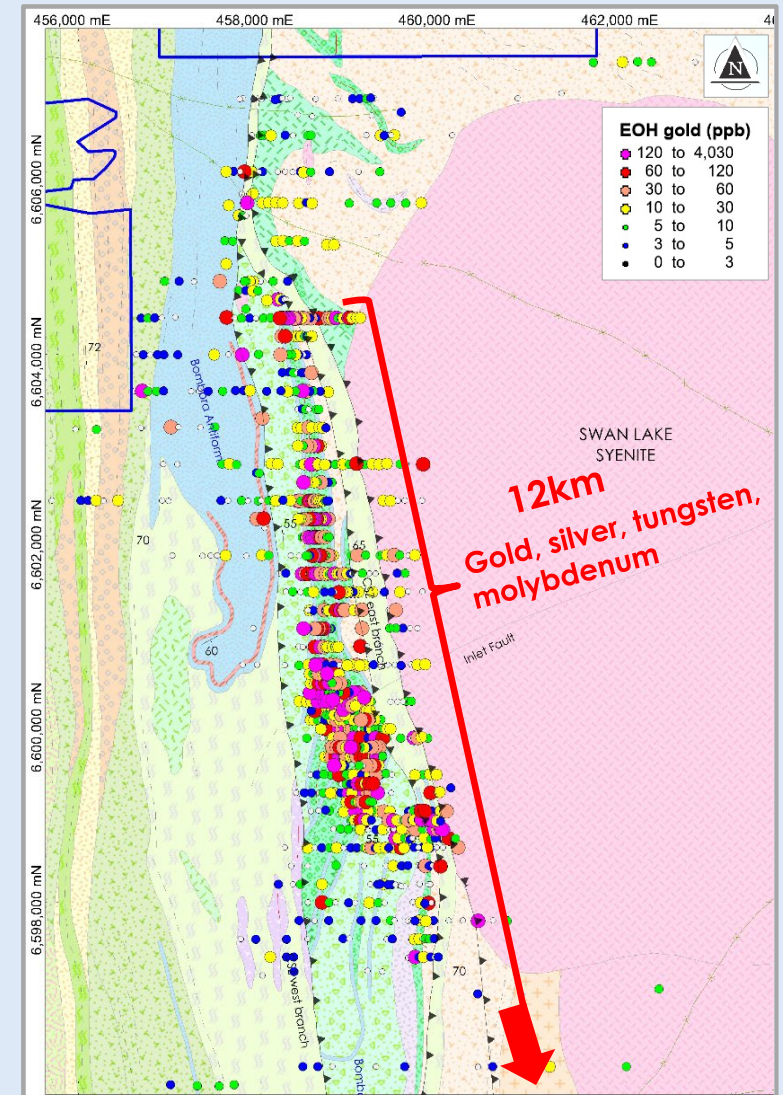

- ✦ RC hits over 2km so far
 - 9m @ 4.90g/t Au
 - 10m @ 2.05g/t Au
 - 9m @ 1.94g/t Au
 - 5m @ 3.49g/t Au

12km zone along granite contact 400m east

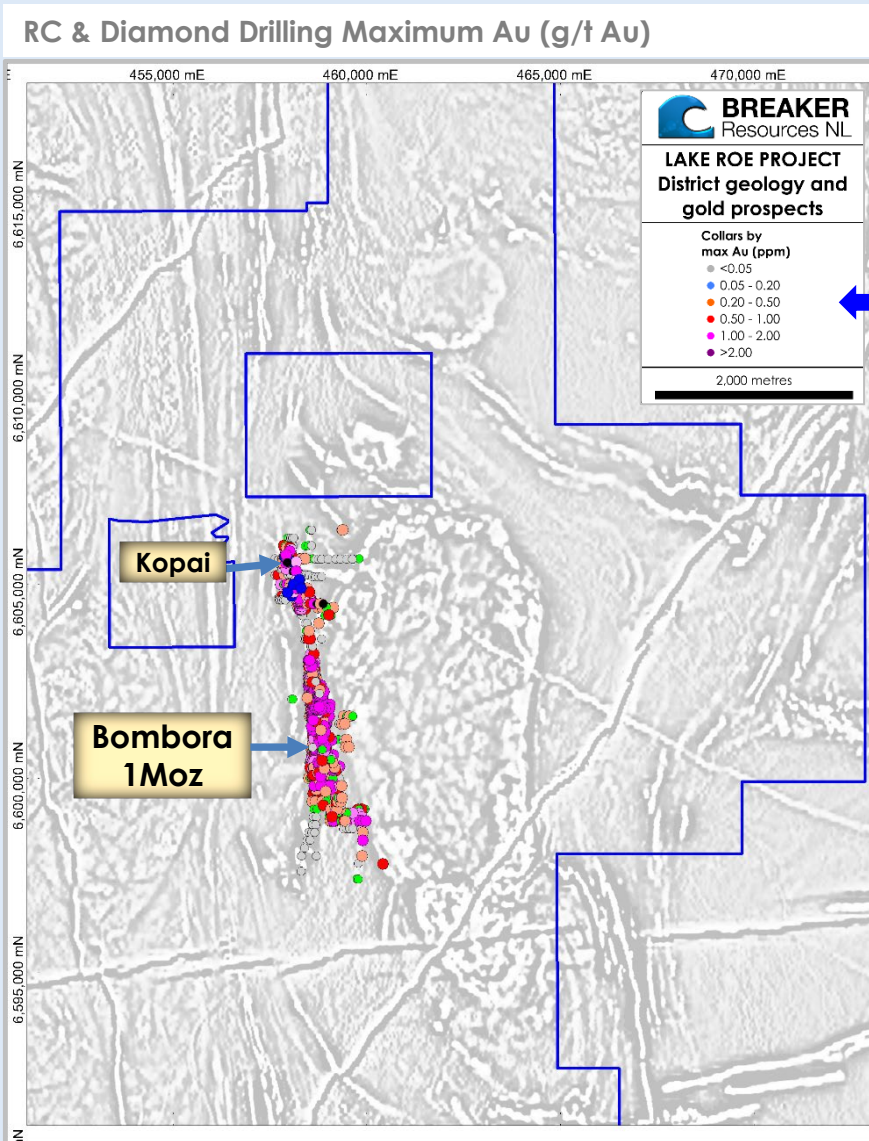

- ✦ Carbineer, first three RC holes
 - 2m @ 7.62g/t Au
 - 5m @ 2.53g/t Au
- ✦ Claypan RC drill hits
 - 5m @ 3.64g/t Au
 - 7m @ 2.67g/t Au
 - 5m @ 2.13g/t Au

None of this is in Resource

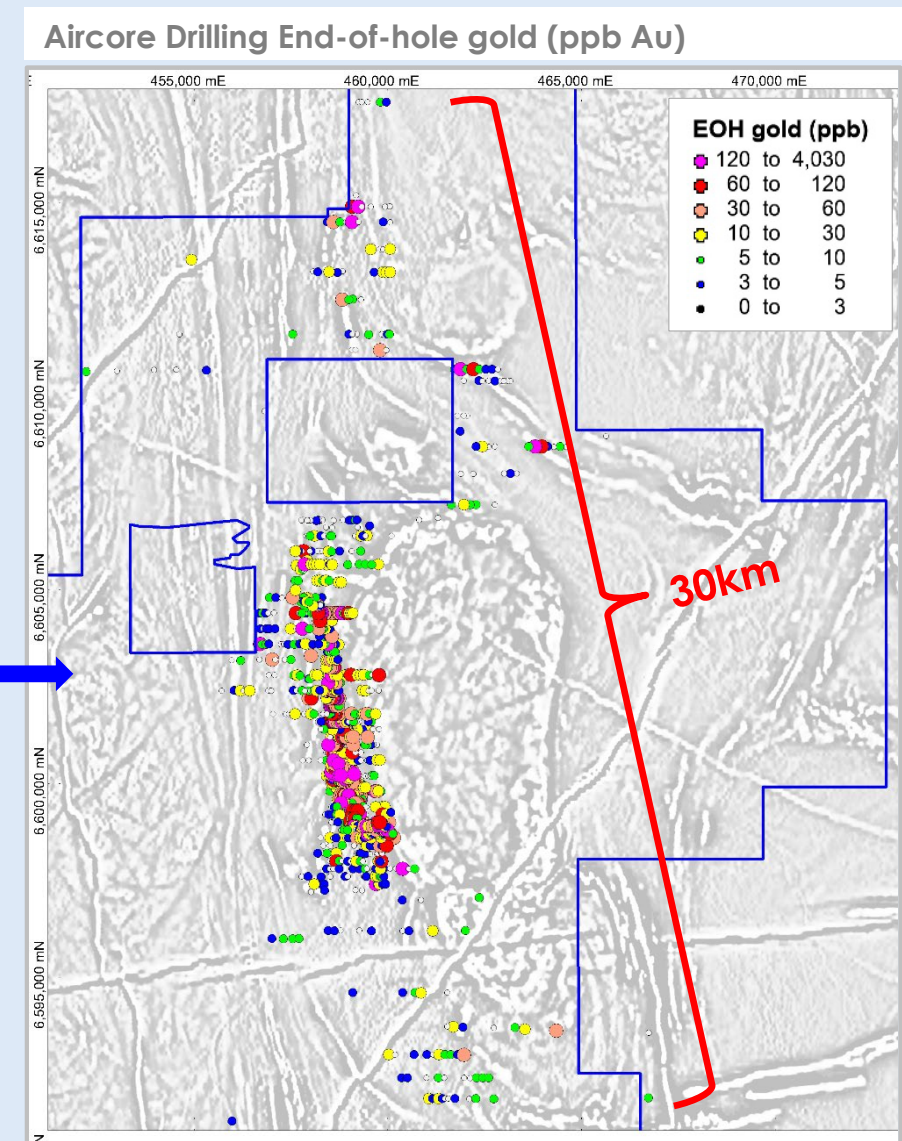

Aircore Drilling End-of-hole gold (ppb Au)

Aircore drilling indicates a 30km gold system

- ✦ Recent RC and Diamond drilling has confirmed a 9km open gold system
- ✦ Recent aircore drilling indicates a 30km-long gold system
- ✦ New targets opening up in many areas

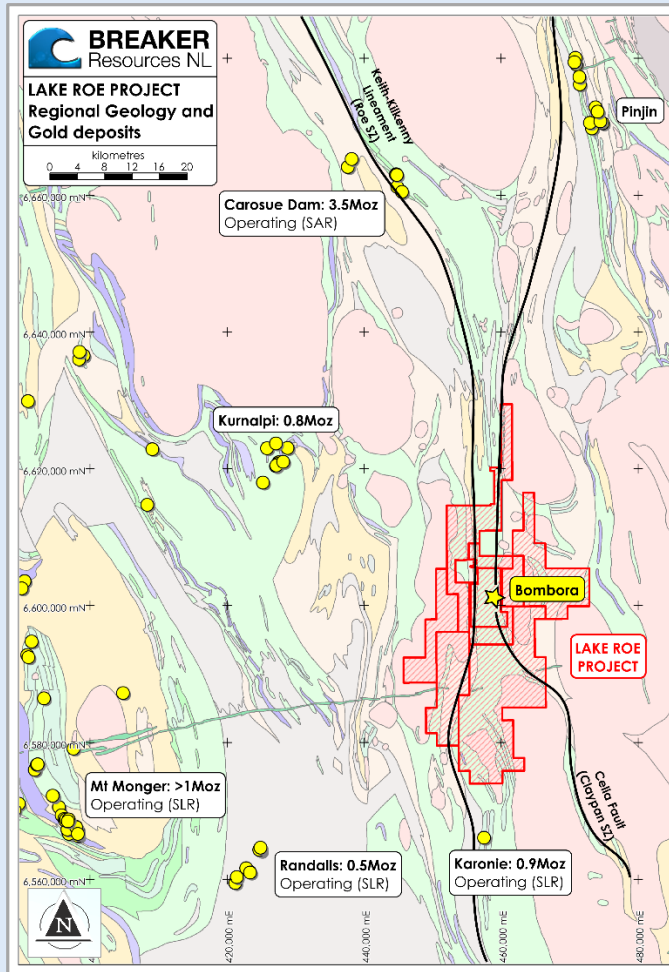

The Lake Roe Project

Thin transported cover (5m-10m) – essentially no bedrock exposure

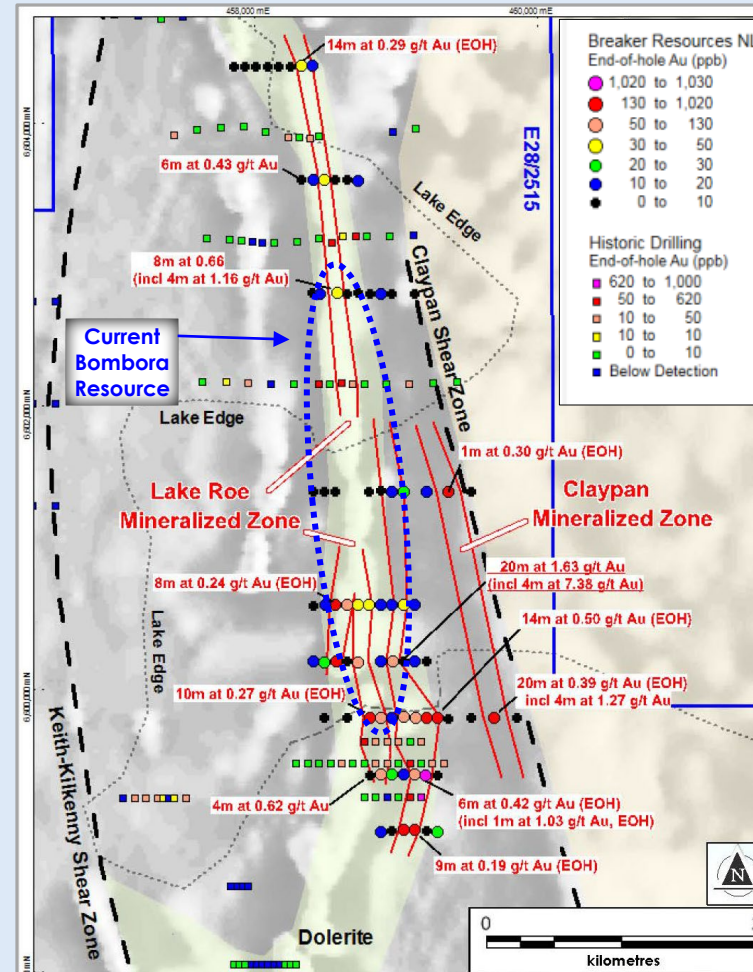

Found “under cover” by identifying the right structure and host rock,
then wide-spaced aircore drilling to guide the RC drilling

Found “under cover” by identifying the right structure and host rock, and wide-spaced aircore drilling

Lake Roe Project location

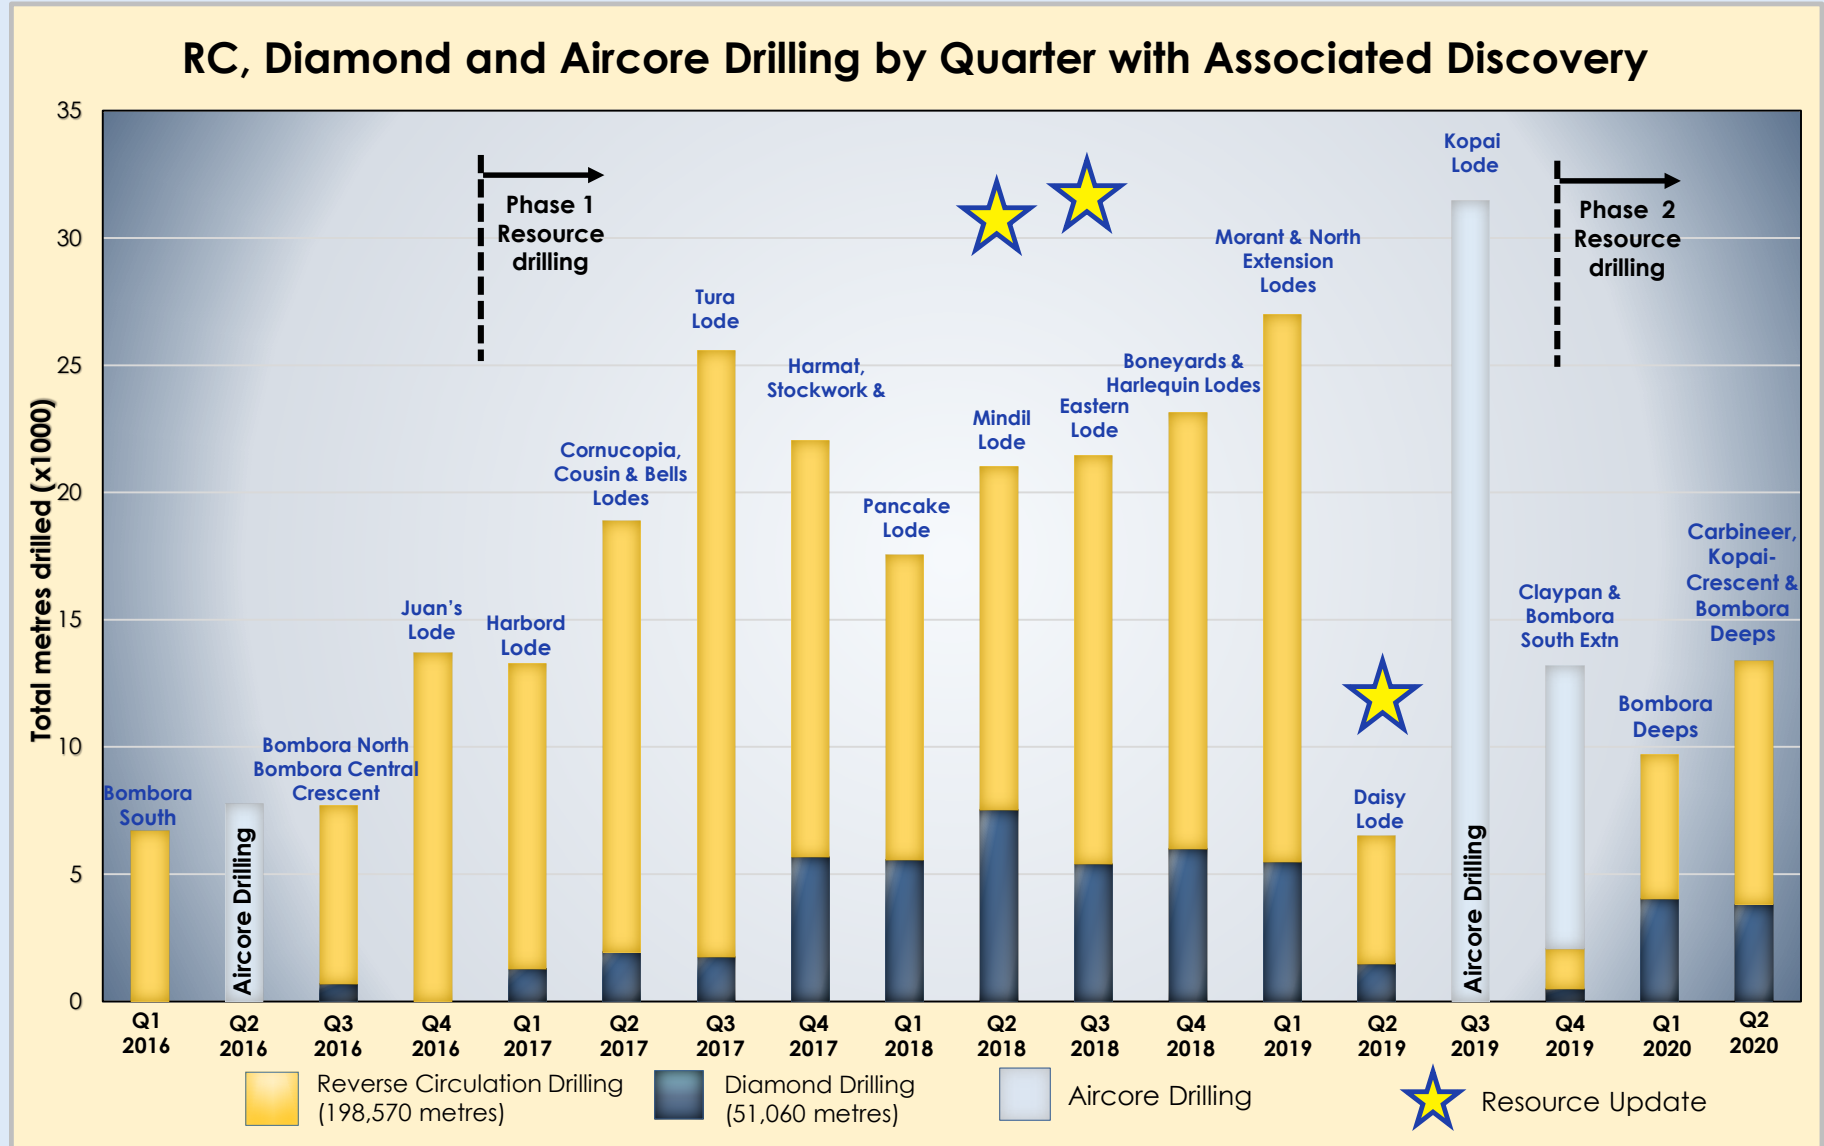

Maiden Aircore Drilling Program*

- ✦ **2012 Breaker IPO** targeting new gold systems under transported cover in Kalgoorlie region
- ✦ **2014** Identified fractionated dolerite next to large regional structural between Carosue Dam and Karonie gold mines
- ✦ **2015 Aircore drilling – gold and pathfinder continuity on wide drill spacing (4m @ 7.38g/t in BAC0765*)**
- ✦ **2016 First primary gold in BBRC0001**, then three discoveries that merged into one deposit
- ✦ **2017 Resource delineation drilling**
- ✦ **-2019 One 3km-long deposit that is still growing**
- ✦ **2020 More discovery**
Bombora Deepes, Kopai-Crescent, Carbineer

Track record of consistent discovery over four years

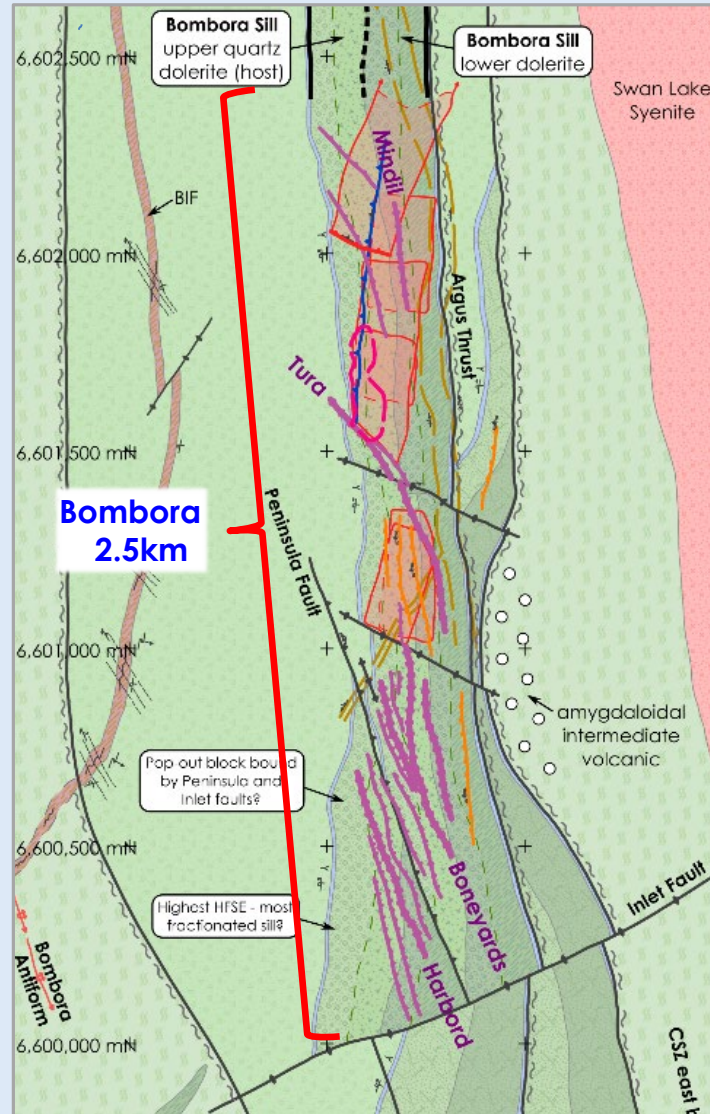

At least three drill rigs operating continuously for foreseeable future

- ✦ At least one discovery every quarter for the last four years
- ✦ An evolving discovery that keeps growing
- ✦ Open in all directions after 250,000m RC/DD drilling

Early focus on de-risking (250,000m RC & DD drilling)

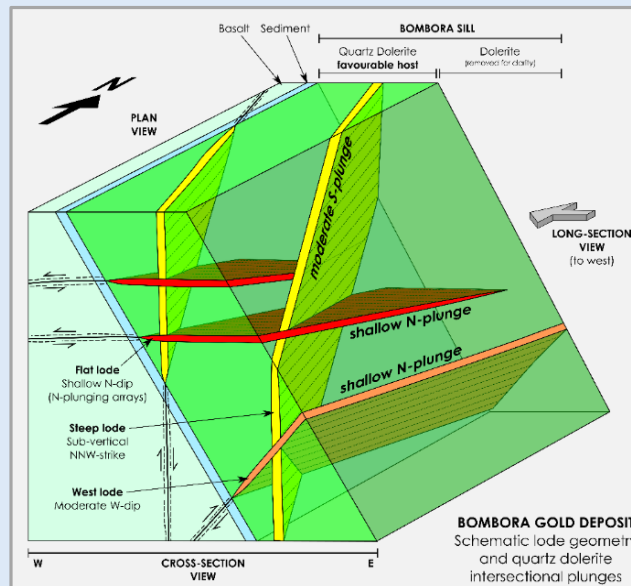

Surface Geology

Typical Archean lode gold deposit eg. Golden Mile, Plutonic, Bellevue

Fine gold in sulphide-bearing shear zones

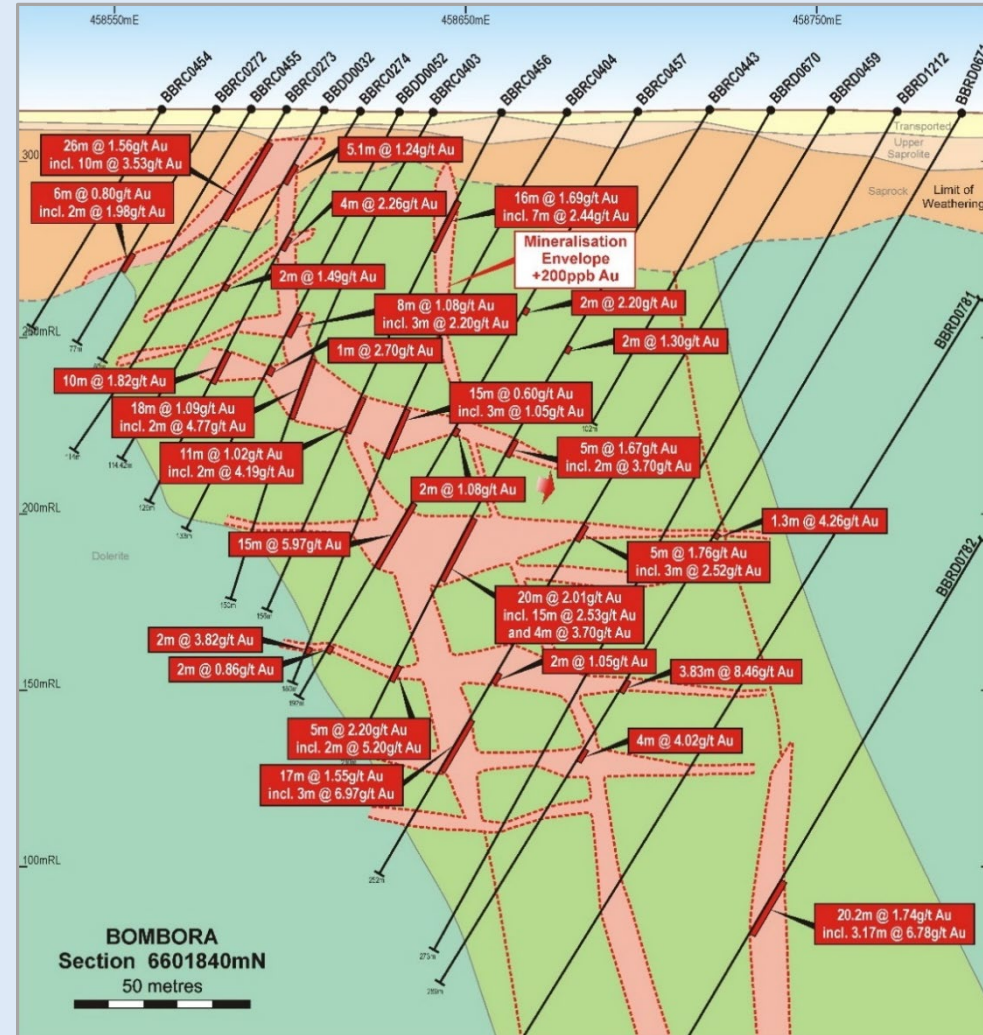

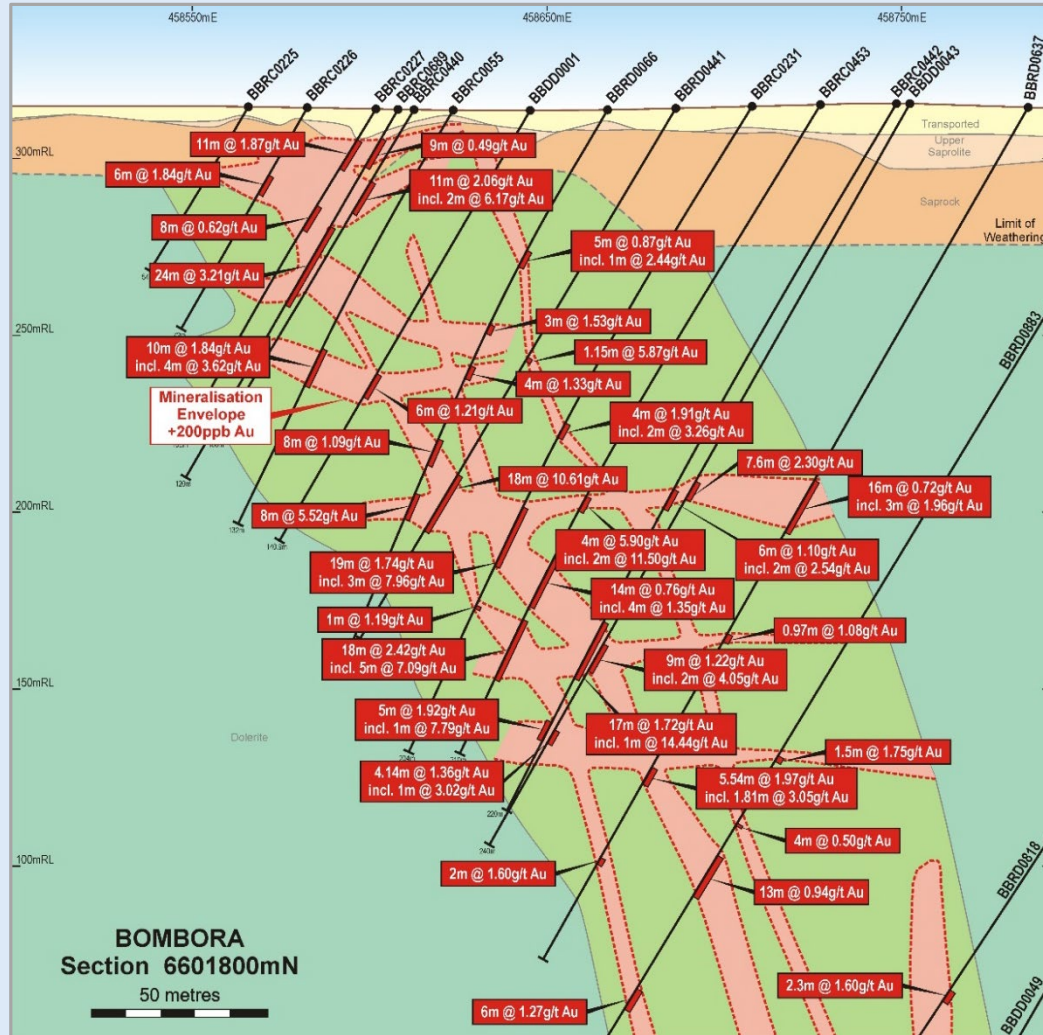

Schematic cross-section

✦ Best geological analogy is Golden Mile, Kalgoorlie – three lode orientations in iron-rich dolerite

- Starting to see other host rocks outside Bombora deposit
- Starting to see “syenite-associated” gold potential to the east of Bombora

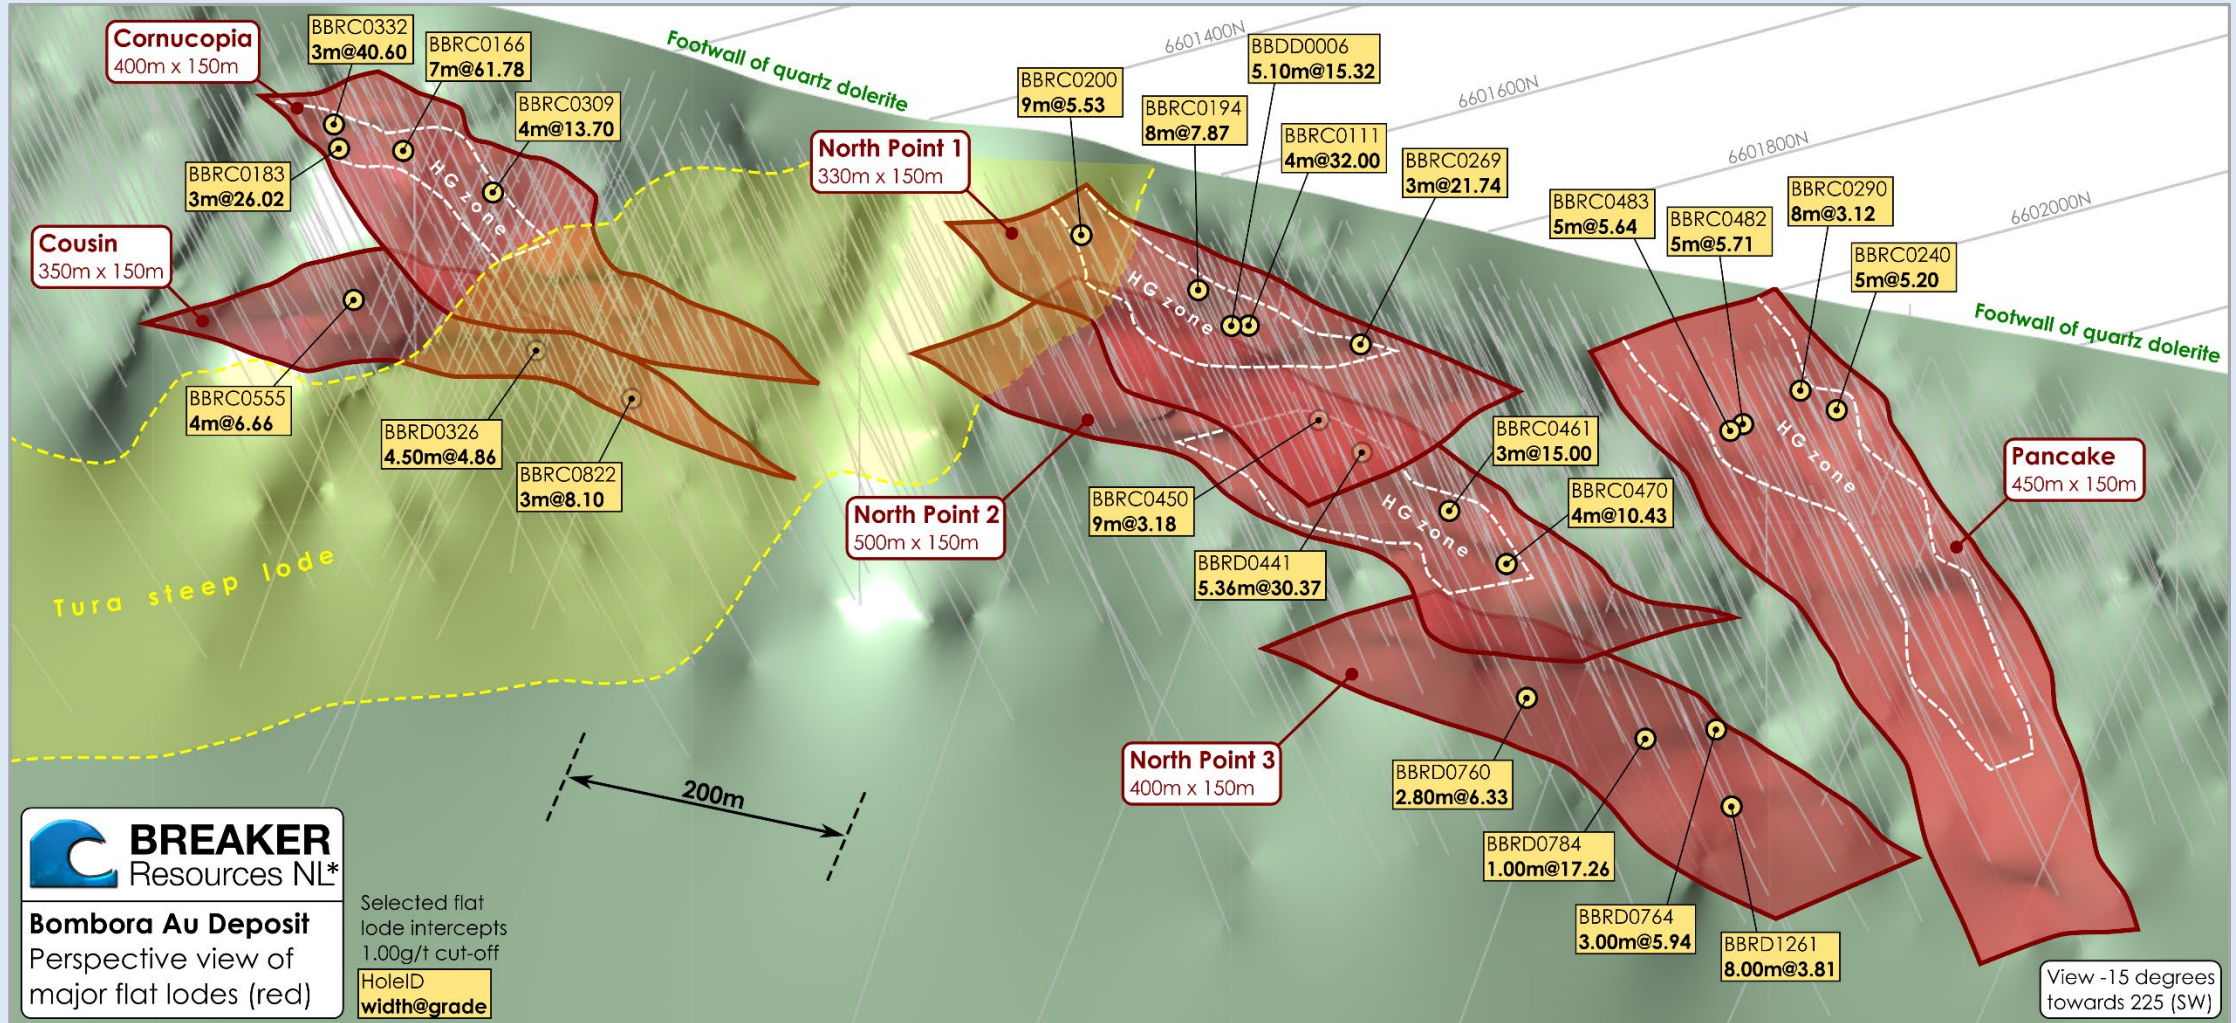

Regular between sections over 3km distance

Low strip ratio configuration — lodes typically 1m to 10m wide — individual lode systems over ~1km-long

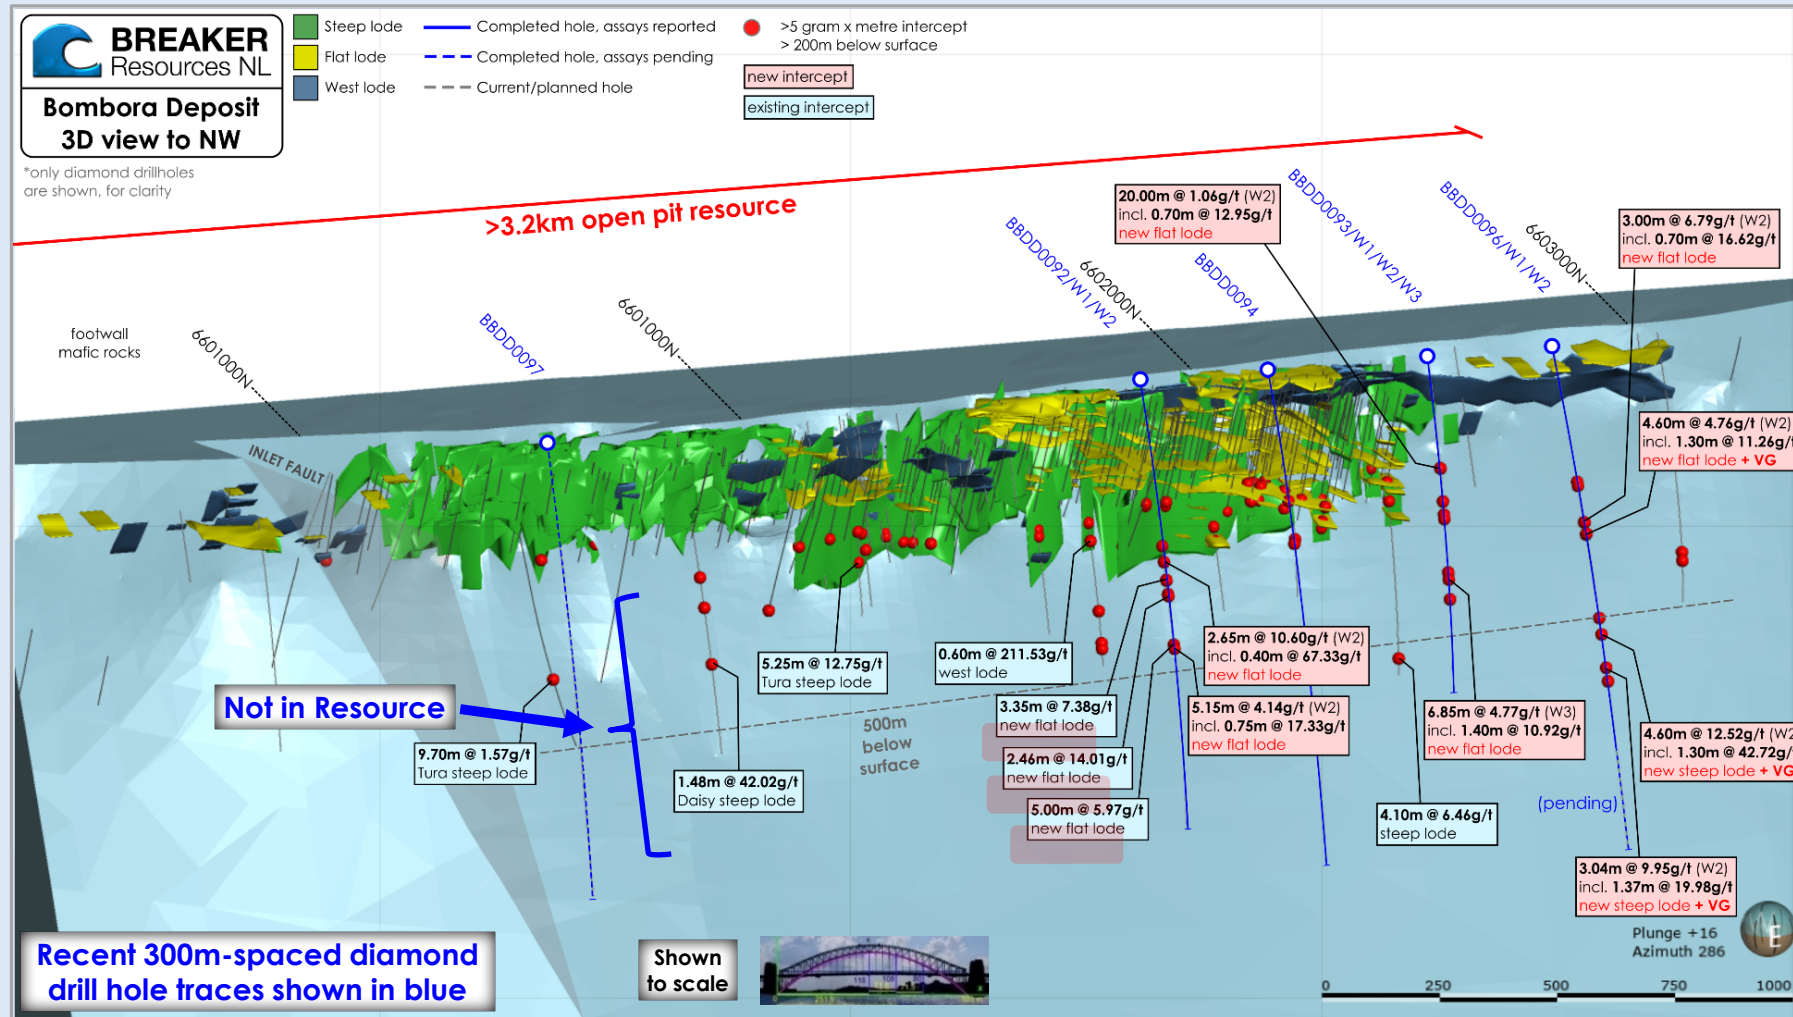

100 cross-sections like this over 3km strike length (40m or 20m section spacing)

Regular high-grade flat lodes

Regular lodes that can be wire-framed and mined

Reconnaissance drilling below Resource on 300m-wide step-outs

- ✦ We are discovering new lodes and extending known lodes at depth on 300m- spaced step-outs
- ✦ ...in preparation for Resource update
- ✦ Plus 2km strike length of high-grade lodes below the open pit Resource (not in Resource)
- ✦ Several lode systems are “kilometric” in scale

Comminution (oxide/fresh)

Gravity/cyanide extraction (oxide/fresh)

- ✦ **Modest ore hardness**
Ball mill work index <16kWh/t for fresh mineralisation
- ✦ **Amenable to standard gravity/CIP/CIL plant**
- ✦ **Excellent gold recovery**
92% oxide and fresh (using saline site water)
96%-99% (using freshwater)
- ✦ **High gravity gold** 31% - 77% (oxide)
32% - 90% (fresh)
- ✦ **Rapid gold leach kinetics**
90% gold in 4 hours
Low reagent consumption
No deleterious elements

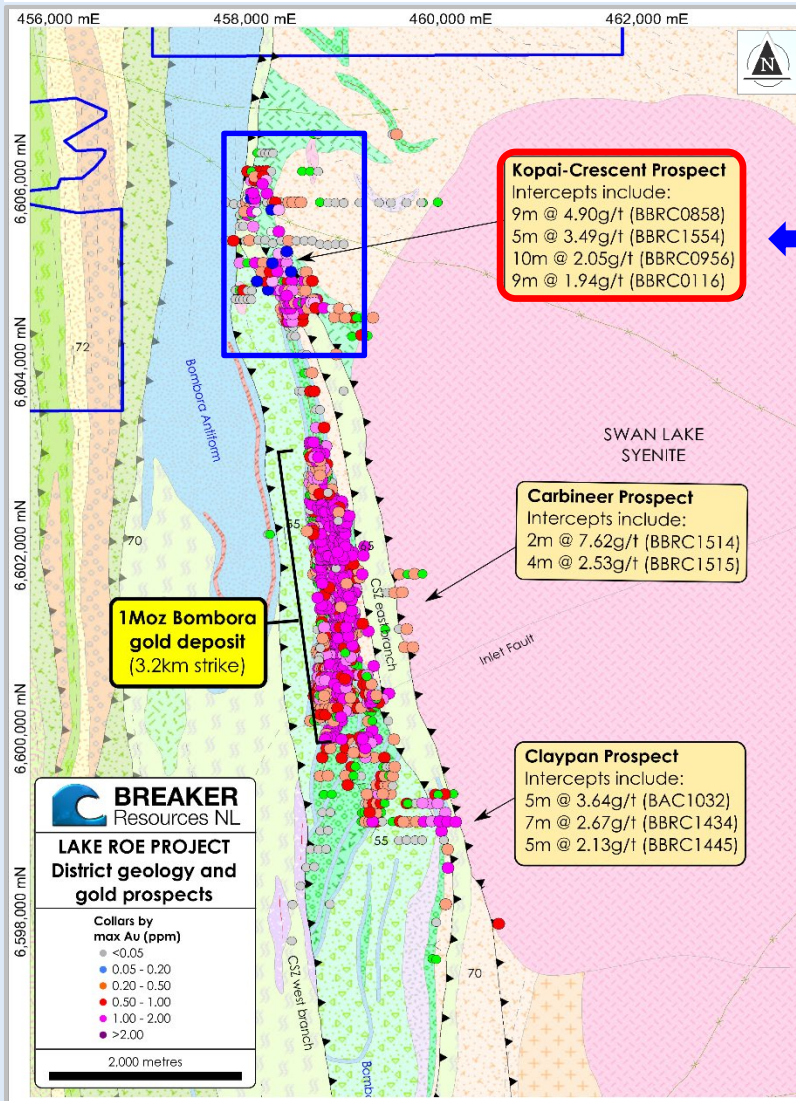

Emerging new shallow gold discoveries

2km-long Kopai-Crescent area

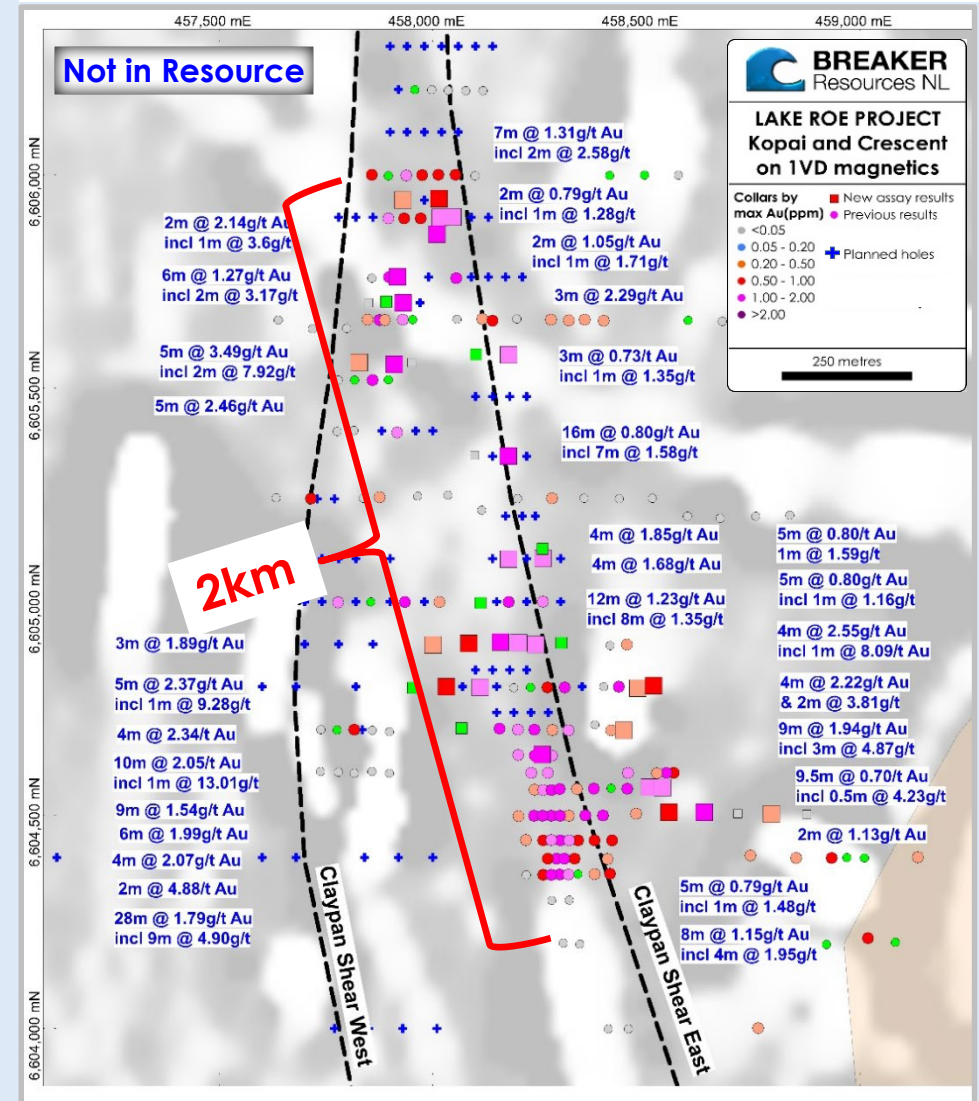

Kopai-Crescent discovery 2km north of Bombora

RC & Diamond Drilling Maximum gold (g/t Au)*

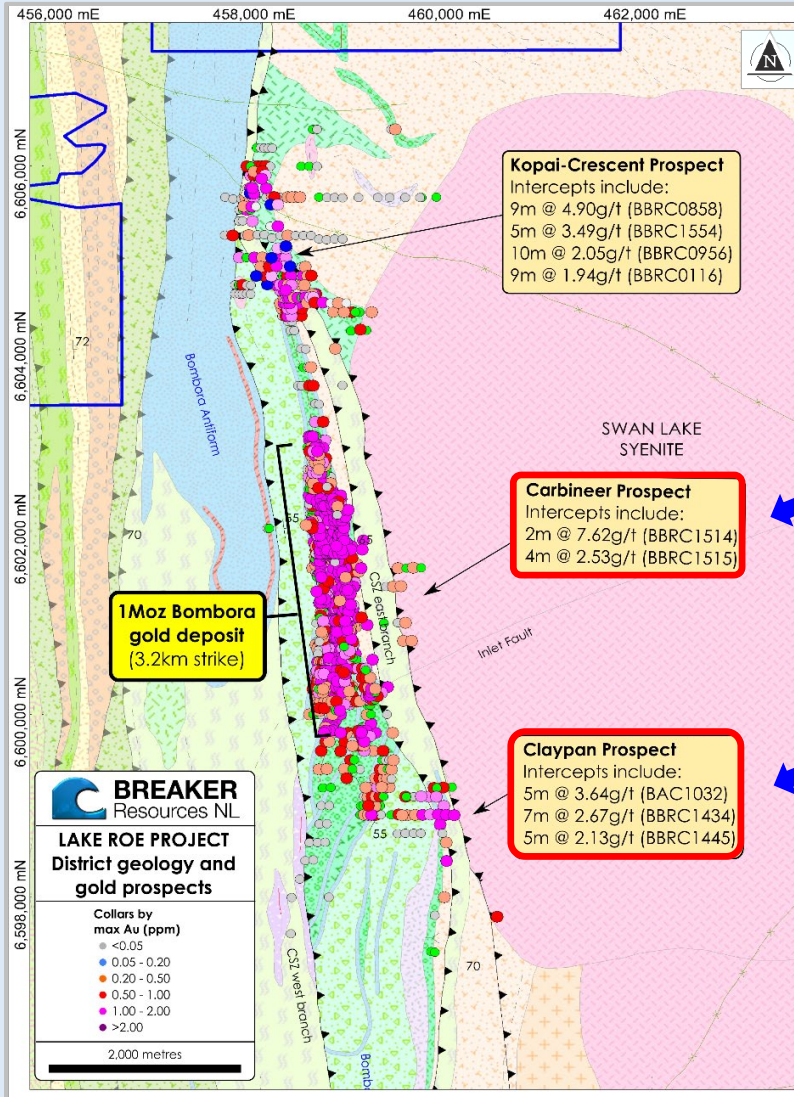

- ✦ 2km-long so far
- ✦ **Kopai-Crescent reconnaissance RC hits**
 - 9m @ 4.90g/t Au
 - 10m @ 2.05g/t Au
 - 9m @ 1.94g/t Au
 - 5m @ 3.49g/t Au
- ✦ **Not yet in Resource**
- ✦ Drilling underway to find the areal extent of the gold while delineating resource
- ✦ Outstanding growth potential

RC & Diamond Drilling Maximum Au (g/t Au)*

Carbineer-Claypan discovery 400m east of Bombora

RC & Diamond Drilling Maximum gold (g/t Au)

Emerging discovery along 12km-long contact of Syenite

✦ Carbineer, first three RC drill holes:

- 2m @ 7.62g/t Au
- 5m @ 2.53g/t Au

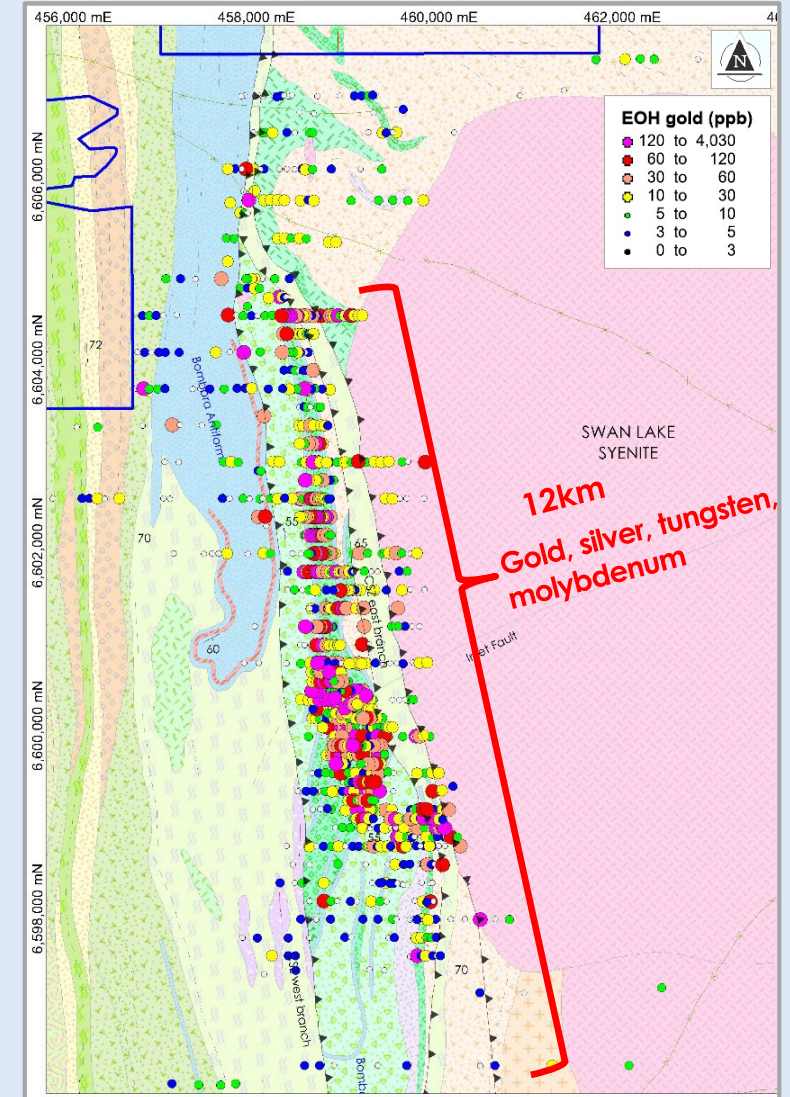

✦ Claypan RC drill hits:

- 5m @ 3.64g/t Au
- 7m @ 2.67g/t Au
- 5m @ 2.13g/t Au

Not yet tracked into syenite

✦ Anomalous end-of-hole gold, silver, tungsten, molybdenum over 12km (1,800 aircore drill holes)

Aircore Drilling End-of-hole gold (ppb Au)

Summary: Location, grade, scale, value & growth

- ✦ A rare emerging greenfields gold camp in a Tier 1 location
- ✦ Well-funded, deep value and outstanding growth potential
- ✦ De-risked open pit base case set to expand
 - 1Moz open-pit Resource[#] (80% Indicated @ 1.4g/t gold[#])
 - High-grade by nature, starting 5m from surface
 - 3.2km long deposit in single pit configuration, feasibility-level metallurgy, advanced environmental & hydro studies
- ✦ New discoveries set to expand Resource along strike/at depth
 - Large areas of identified gold not yet in resource
- ✦ Ongoing news flow and growth
 - At least three drill rigs running continuously
 - Resource updates
 - Ongoing discovery

A rare new greenfields gold camp, 100km from Kalgoorlie, Western Australia
